EDUCATION

Nanjing University of Science and Technology **Sep 2023 - Present**

B.Eng. in Cybersecurity, School of Cyber Science and Engineering

GPA: **3.72/4.00** | Weighted average: **88.71/100** | Rank: **4/51 (top 7.8%)** CET-4: 635 CET-6: 647

Research interests: Machine Learning, Recommender Systems, Matrix Completion, and Uncertainty Quantification

RESEARCH PROJECTS

Mar 2025 - Jul 2026 **Conformalized 1-Bit Matrix Completion: Theory and Applications** **Project Lead**

- Proposed C1B-MC, a distribution-free framework for uncertainty quantification in binary matrix completion; developed odds-ratio weighting for covariate shift and derived exact finite-sample marginal coverage bounds with infinity-norm truncation.
- Implemented a joint low-rank factorization and log-barrier optimization strategy; achieved target coverage on real data and stress tests where classical asymptotic methods failed under overparameterization. Manuscript accepted to an ICDM 2026 Workshop.

Jan 2026 - Jun 2026 **Elastic Net and Nuclear Norm Matrix Regression for Face Recognition** **Core Member**

- Designed the application framework for Elastic Net Nuclear Norm Matrix Regression and contributed to its ADMM and singular-value-thresholding implementation.
- Ran experiments under illumination and occlusion shifts, conducted classification-accuracy ablations, and visualized finite-iteration convergence. Manuscript accepted to ICETCI 2026.

Sep 2024 - Nov 2024 **Feedforward Neural Network from First Principles** **Independent Project**

- Derived and implemented matrix operations, ReLU gradients, Softmax probabilities, backpropagation, and gradient descent using NumPy without automatic differentiation; reached 84.8% validation accuracy on MNIST after hyperparameter ablations.

SELECTED HONORS

2025-2026	National Scholarship
2026	Mathematical Contest in Modeling - Meritorious Winner
2024	National English Competition for College Students - National Grand Prize
2024	NECCS National Finals - First Prize in Speech and Second Prize in Debate
2024	FLTRP Vocabulary Competition - First Prize, Jiangsu Province
2024	Chinese Mathematics Competitions for College Students - Third Prize, Jiangsu Province
	NJUST Outstanding Student Scholarship - Second Class (5 awards)
	Outstanding League Member
	Excellent Participant in Scientific and Technological Activities

LEADERSHIP AND SERVICE

Peer Mentor, Zhixin College, NJUST **Sep 2025 - Present**

Mentor junior undergraduates on coursework and career planning; support academic exchange and student well-being activities.

Student Assistant, Jiangyin Campus Student Affairs Office **Oct 2023 - Jun 2025**

Supported student services, document drafting, ID-card applications, and preliminary medical-insurance reimbursement review.

TECHNICAL PROFILE

Methods: Conformal prediction, matrix completion, low-rank optimization, ADMM, statistical learning, ablation studies | **Programming:** Python, NumPy, data visualization
